# velox Luggage Sharing System App

The Velox App is designed by minimalism in mind. The app greets you with a tutorial to inform you about the system. With 5 easy steps you can book, rent and track down your 'Velox'.

## Problem :

Nowadays people are traveling more and more. The more people travel, the more luggage is used which causes more waste and storage space. The luggages we use now are often take a lot of space when not used, it demands maintenance as time passes by. People buy new bags, luggages even for one flight when they don't need occasionally because there's no other alternative

## Solution :

Velox is a luggage sharing/renting system. The system has points around the globe and with the help of an app you can easily book, rent your luggage like you're booking a flight or a cinema ticket. It offers a delivery system or you can pick it up on your own.

## The Challenge

My main goal was to design 3 home appliances tools that would be able to connect with an app and make your life easy with features like a timer, defrost capability.

Locos App let's you control up to 3 smart home appliances devices which include coffee maker, oven and a toaster. The app includes a timer section that let's you set a timer for a fresh cup of coffee in the morning, or a delicious meal ready when you get home

## Problem

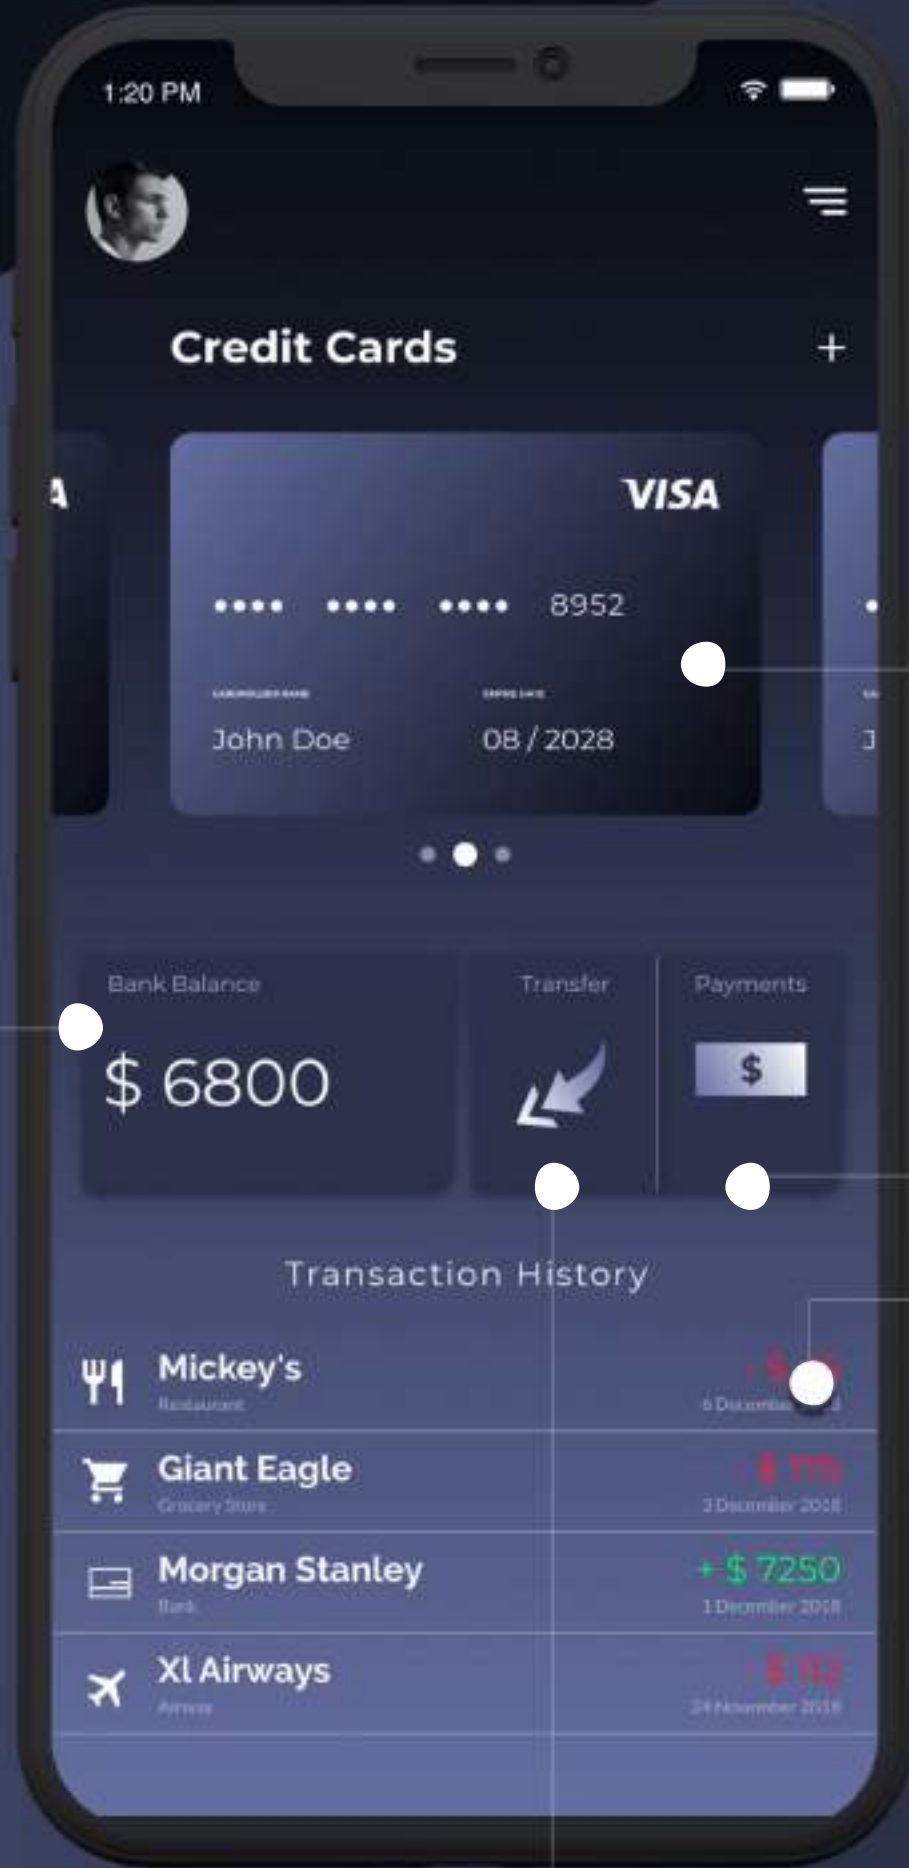

Customers often use several bank accounts, banks, credits cards sometimes tracking down these different payments, transactions transfers can be really frustrating.

## Challenge

Design an application that combines all your financial accounts, credit cards, bank information under one roof, which will allow them to be tracked down easily.

Add/Link accounts instantly.

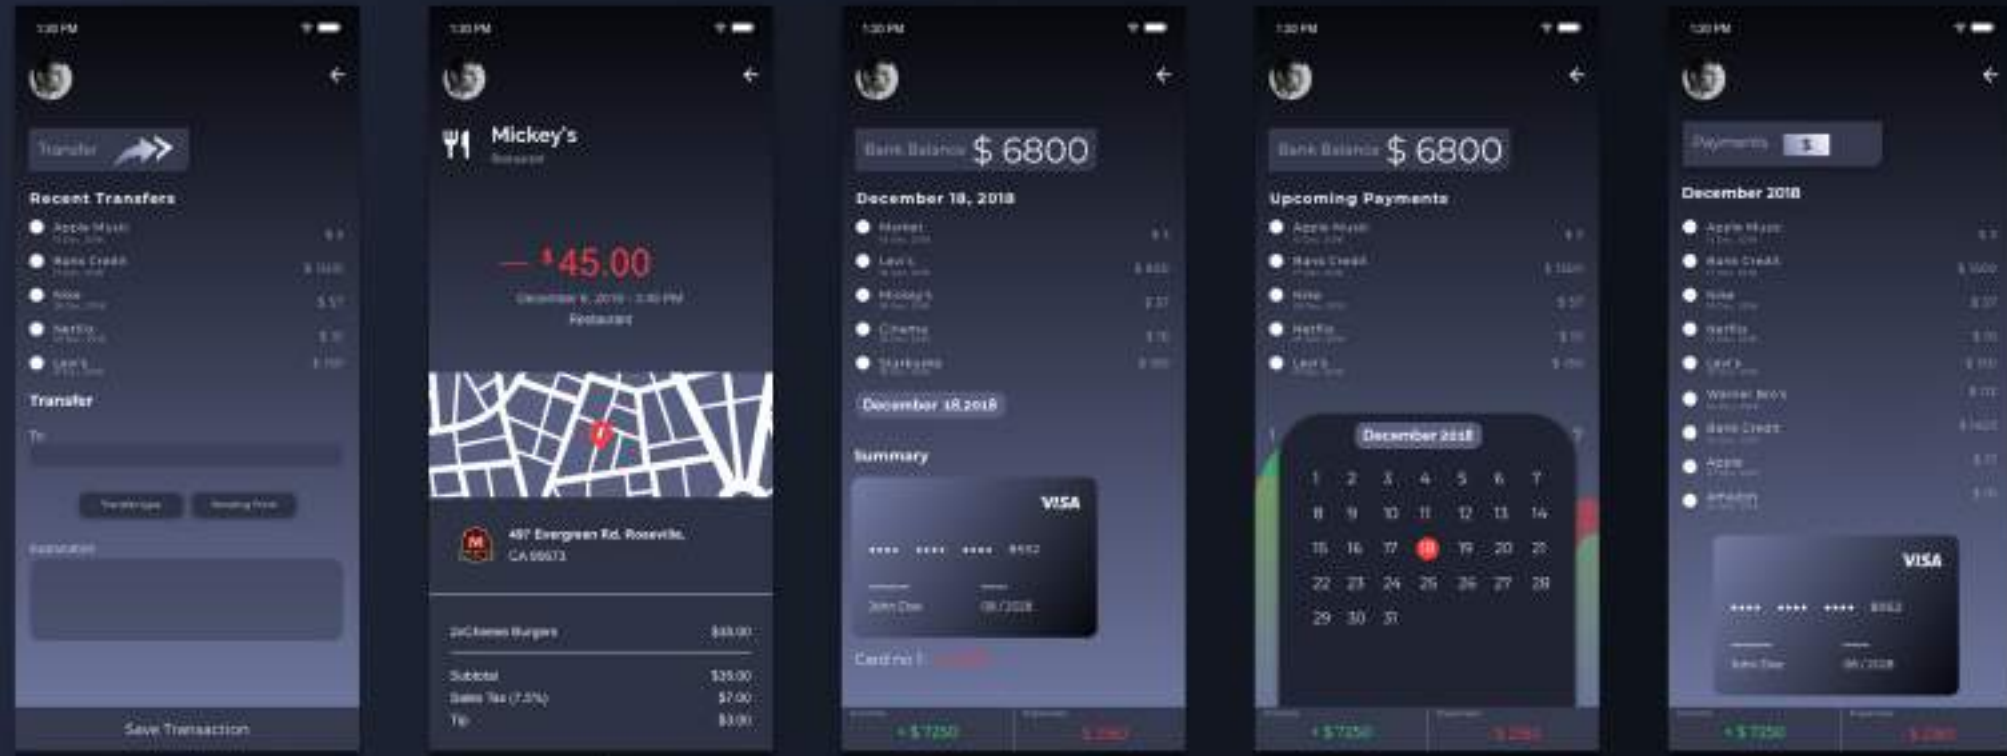

Choose from linked cards.

Go to your payments page with one tap.

Easily do your financial transfers.

Track down all of your savings, financial status.
